

CuVerro Copper kills bacteria & keeps killing it

MRSA Count on Copper and Stainless Steel Plates

**CuVerro Copper
Kills 99.9%
of bacteria
within 2 hours
of exposure***

+ Initial inoculation of 10.4M organisms

MRSA Count on Copper and Stainless Steel Plates

+ Each inoculation adds 650k organisms

**CuVerro Copper
Continuously
kills bacteria
even after
recontamination***

*Laboratory testing shows that, when cleaned regularly, CuVerro copper surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: Methicillin-Resistant Staphylococcus aureus (MRSA), Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, E. coli O157:H7, and Vancomycin-Resistant Enterococcus faecalis (VRE). The use of CuVerro® bactericidal copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. CuVerro® is a registered trademark of GBC Metals, LLC and is used with permission. See cuverro.com for more details. (OB-0039-1608)
